

Selected CV

Selected work in research, teaching and artistic practice.

Research & teaching

2026–	Director, ArCiTeS Instituto de Investigaciones en Arte, Ciencia, Tecnología y Sociedad, Universidad Nacional de Quilmes.
2019–	Full Professor Escuela Universitaria de Artes, Universidad Nacional de Quilmes.
2017	Founder, Proyecto GRAPa Grupo de Relevamiento Acústico del Patrimonio.
2007	Founder, LAPSo Laboratory of Acoustics and Sound Perception, Universidad Nacional de Quilmes.
	CONICET researcher Physics, nonlinear dynamics, neuroscience and acoustics.

Director of Perspectiva Acústica, Etapa II (2025–2029), a UNQ research programme comprising seven projects.

Education

2002	PhD in Physics Universidad de Buenos Aires.
1998	Licenciatura in Physics Universidad de Buenos Aires.

Exhibitions, residencies & support

2024	Sonic Crystal Room Festival de Nueva Ópera, opening programme, cheLA, Buenos Aires. With Oscar Edelstein.
2023	Transit · Artist residency & commission Northern Sustainable Futures, Moskosel, Sweden. With Mauro Zannoli, for iM Konsthall.
2022	Biocenosis · 13th Mercosul Biennial Porto Alegre, Brazil. Sigismond de Vajay & Kevin Lesquenner + LAPSo.
2021	Latin GRAMMY Cultural Foundation Research Grant With Proyecto GRAPa: recording canto con caja in its original acoustic environments.
2019	Sonic Crystal Room · First presentation Auditorio Nicolás Casullo, Universidad Nacional de Quilmes, Bernal.
2011	Lluvia de Arañas sobre el Riachuelo Collective project with Sigismond de Vajay and Buenos Aires Sonora. Noche de los Museos, Buenos Aires.

Scientific publications

-
- 2026** The influence of visual context on auditory distance perception: A comparison between real and virtual visual environments
Cerviño, Lombera, Piceda, Eguía & Vergara · Applied Acoustics 250, 111334
-
- 2026** Real-time sound synthesis from normal forms of dynamical systems
Ortega Brook, Ruiz & Eguía · Journal of New Music Research · Online publication 2026
-
- 2025** Encrypted acoustical communication system using time reversal through a tunable sonic crystal
Gómez, Spiousas & Eguía · The Journal of the Acoustical Society of America 158(3), 2100–2110
-
- 2022** IRIS: A tunable sound sculpture based on acoustic periodic composites for musical performance
Salzano & Eguía · Journal of New Music Research 51, 27–39
-
- 2021** Time reversal focusing in the audible range using a tunable sonic crystal
Gómez, Spiousas & Eguía · The Journal of the Acoustical Society of America 149(6), 4024–4035
-
- 2017** Auditory environmental context affects visual distance perception
Etchemendy, Abregú, Calcagno, Eguía, Vechiatti, Iasi & Vergara · Scientific Reports 7, 7189
-
- 2015** An auditory illusion of proximity of the source induced by sonic crystals
Spiousas, Etchemendy, Vergara, Calcagno & Eguía · PLOS ONE 10, e0133271
-
- 2014** A comparative study of saxophone multiphonics: Musical, psychophysical and spectral analysis
Riera, Proscia & Eguía · Journal of New Music Research 43(2), 202–213

Selected artistic collaborations

-
- 2023–2024** Beehive / Colmena
Jorge Macchi
Multichannel sound realization. What the Night Tells the Day, PAC, Milan.
-
- 2023** Glockenbuch IV (Spectre Maria dei Carmini)
Marcus Schmickler, in collaboration with Julian Rohrerhuber
Multichannel sound collaboration. Sound Microscopies programme, Biennale Musica, Venice.
-
- 2021** Reliquias
Jorge Caterbetti
Technical collaboration on the installation dedicated to Julio López. Centro Cultural Kirchner, Buenos Aires.
-
- 2020** La Cathédrale engloutie
Jorge Macchi
Development of the sound installation, with UNQ support. Musée cantonal des Beaux-Arts, Lausanne. 10 September–22 November.
-
- 2019** Huella Sonora / Alfombra Sonora
Jorge Caterbetti
Technical collaboration on an interactive sound installation within Green Carpet. Centro Cultural de la Ciencia, Buenos Aires.
